RiceTec®

FIELD GUIDE

YOUR COMPLETE GUIDE TO THE 2027 SALES PROGRAM

Exceptional Products • Expert Guidance • Built for the Field

WELC

Unveiling our product lineup every season is always a high point. We love that it's part tradition and part innovation, and this year is no different: we're proud to showcase our tried-and-true performers, and excited to introduce our new RiceReach mobile app.

This year we're also honoring farm families whose tenacity over generations is an inspiring example of work ethic for the industry and the nation. The agricultural economy is driven by growers whose values are steadfast and enduring. We celebrate their spirit and grit, and we share their pursuit of excellence.

Every harvest starts with seed, and our commitment to developing and delivering high-value, high-yield rice gives farmers the confidence that their hard work will produce results. Powered by science and proven in soil, our seed is built for the field.

Your RiceTec Sales Representative is ready to visit, talk about what's new, answer your questions and offer support however we can to make 2027 a better year.

CUSTOMER LOYALTY REBATE PROGRAM 2027

Participation in Legacy Rebate Program

Qualify for Volume Rebate

Qualify for **100% Stand Guarantee**

+ LOYALTY EARLY ORDERING PERIOD

Exclusive to loyalty program participants • October 1st-November 1st time frame • Product quantities subject to availability

TIME FRAME

- Full Season Program
- 4% rebate sent by October 31st, 2027

REQUIREMENTS

- Submit certified 2027 FSA 578 by August 1st, 2027
- Purchase and plant ≥90% of planted FSA 578 long grain rice acres with RiceTec seed for the 2027 growing season

PROCEDURE

- Submit FSA 578 forms to RiceTec Rep.
- Purchase and plant no less than 90% of the total 2027 FSA-certified long grain acres, net of returns, with RiceTec seed
- Customer will receive rebate by October 31st, 2027
- All purchased seed must be paid in full prior the issue of payment

EXCLUSIONS

× 1 unit = 2 FSA acres on hybrids and 1 FSA acres on variety
× Levee products are excluded from the 90% acre calculation
× Rebate will be based on total amount of qualified products purchased by customer

If you qualify for the loyalty program in 2027, RT3202 purchases also qualify for rebates.

CUSTOMER LEGACY REBATE PROGRAM 2027

1.5% ADDITIONAL REBATE

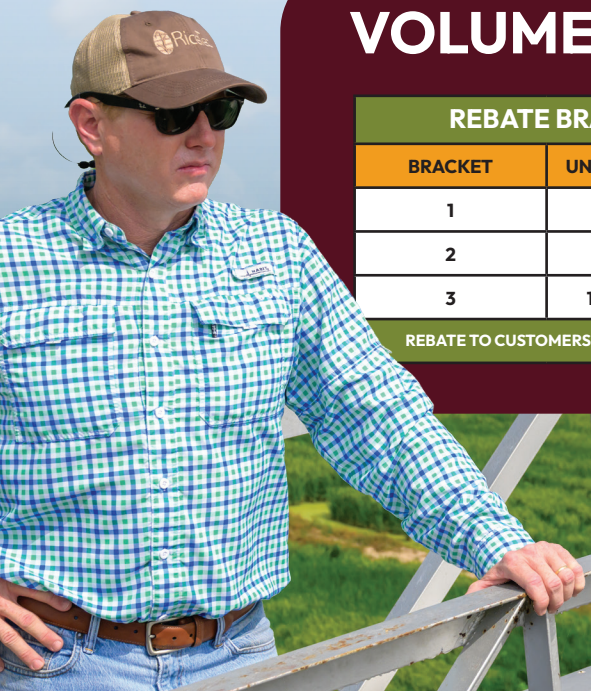

Payable in the fall of 2027 for customers who qualified for the Loyalty Rebate program in 2025, 2026, and 2027

REQUIREMENTS

- Purchase and plant ≥90% of planted FSA 578 rice acres with RiceTec seed for the 2027 growing season, net of returns
- Upload certified 2027 FSA 578 by August 1
- All purchased seed must be paid in full prior to issue of rebate

NOTES

- 1 unit = 2 FSA acres on hybrids and 1 FSA acre on varieties
- Levee products are excluded from the 90% FSA acre calculation
- The Super Loyalty Rebate Program is being discontinued; however, customers that qualified for Super Loyalty status for 2025 will still receive rebates per that program in addition to the Legacy Rebate Program

VOLUME REBATE PROGRAM 2027

REBATE BRACKET STRUCTURE		
BRACKET	UNITS PLANTED*	REBATE
1	250 to 599	1.5%
2	600 to 1249	3%
3	1250 or more	5%
REBATE TO CUSTOMERS BASED ON BRACKET/UNITS PLANTED		

PROCEDURE

- In order to qualify for the Volume Rebate Program, the grower will need to qualify for the Customer Loyalty Rebate Program
- 2027 Levee products are excluded from the program

POWERED BY

SQUAD™

INNOVATIVE SEED TREATMENTS

Leading the way in innovative and high-performance seed treatments for rice growers.

Squad seed treatment offers premium solutions specifically designed for rice growers. Our proprietary recipes are applied directly to the seed before planting, ensuring the right coverage and rate of each product. This enhances germination, protects against pests and diseases, boosts early growth performance, and aids in technology identification.

With Squad, growers have multiple seed treatment options for a customized solution conveniently "in the bag." RiceTec rigorously tests our products across various years, geographies, and environments. This ensures farmers receive solutions tailored to their unique needs, resulting in healthier, more uniform crops, improved germination, and greater yield potential.

Plant with confidence, knowing Squad delivers unmatched value and performance, maximizing your seed's potential.

The Squad product line has three seed treatment options:

SQUAD PRO

For growers in the Midsouth looking for a premium seed treatment in the bag, RiceTec has a limited supply of Squad Pro. The Squad Pro package offers broad-spectrum, early-season insect and disease protection combined with increased rice water weevil control and suppression of billbugs. While this product is a great fit for all drill-seeded acres, it provides extra protection for pests associated with row rice, like billbugs.

SQUAD GULF

For Gulf Coast rice farmers, Squad Gulf is customized for growers along the coast who deal primarily with rice water weevils and stem borers throughout the season. The Squad Gulf package has approval for use in both water-seeded and drill-seeded production systems.

SQUAD DELTA

Squad Delta will be the most widely available package that fits most Midsouth production systems. Squad Delta has been a reliable seed treatment package for several years throughout the southern rice belt, and has provided consistent early-season insect and disease protection for most drill-seeded rice acres.

All three Squad products will include a base package of gibberellic acid, zinc, and a combination of four fungicides.

SEED

REVOLUTIONIZING RICE PRODUCTION

RT3202

The new standard in the Southern medium grain market, RT3202 offers superior yield, disease resistance, standability, and the earliest maturity in the medium grain segment. RT3202 needs to be harvested between 18% and 22% moisture to maximize grain quality. RT3202 is not tolerant to Rogue® herbicide, so do not apply Rogue* to this product.[1]

Grain Type:	**Medium Grain**
Milling Average[2]:	**61/71**

REVOLUTIONIZING RICE PRODUCTION

RT7302

The next evolution in long-grain genetics, RT7302 is the first long-grain release with a yield advantage over XP753. It performs well across all environments, has improved milling characteristics, higher amylose content desired by our export markets, and an excellent disease package.[1]

Grain Type:	**Long Grain**

FULL PAGE®
RICE CROPPING SOLUTION

A BETTER WAY TO GROW RICE

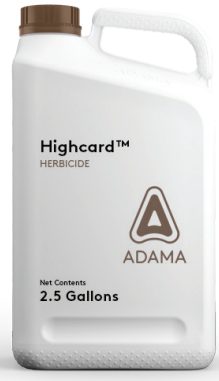

RiceTec and ADAMA designed a rice program that improves hybrid herbicide tolerance and generates industry-leading yields. RiceTec offers a full suite of seed options for the FullPage® Rice Cropping Solution. Used in conjunction with Preface™, Postscript™, and FullScript™ herbicides from ADAMA, the FullPage rice systems delivers an integrated solution that provides excellent control of weedy/red/feral rice, barnyardgrass, and most other common and challenging rice weeds.

SUPPORT WHEN AND WHERE YOU NEED IT

For growers that follow the best practices outlined in the RiceTec FullPage Technology Use Agreement, RiceTec and ADAMA will provide the training, education, and assistance to support your success if any problems should arise.

Preface, Postscript, and FullScript are the only approved IMI-based herbicides for use with FullPage rice seed. The use of any other formulations of imazethapyr, imazamox or premixes containing these two active ingredients is strictly prohibited.

MAX-ACE®
RICE CROPPING SOLUTION

MAX-ACE® RICE CROPPING SOLUTION WITH HIGHCARD™ HERBICIDE

Rice growers wanting to maximize return and maintain weed control options turn to the Max-Ace Rice Cropping Solution with Highcard herbicide. It provides unprecedented hybrid and varietal yields and weed and grass control with maximum crop safety due to ADAMA's proprietary herbicide formulation.

EFFECTIVE GRASS AND WEED CONTROL

Growers can count on Max-Ace rice and Highcard herbicide to effectively deliver control of a broad range of grass weeds, including red and weedy rice and IMI-resistant weeds for cleaner fields and increased crop vigor.

Highcard herbicide must be used as part of the Max-Ace Rice Cropping Solution because it is a novel, safened product. The use of any other formulations of quizalofop is strictly prohibited.

SCAN FOR MANAGEMENT GUIDELINES AND STEWARDSHIP POLICY

100% STAND GUARANTEE POLICY 2027

The 2027 RiceTec Stand Guarantee is designed to provide replant seed at no cost to RiceTec Loyalty seed customers in the event the customer does not get an adequate initial stand on his/her RiceTec rice acreage.

ELIGIBILITY & LIMITATIONS

- Purchases and plants 90% or more of his/her 2027 rice acres in RiceTec seed.
- Orders and receives seed from an authorized RiceTec Service Partner location in 2027.
- Use current year tested and germ guaranteed seed to be eligible for replant.
- Drill seed the rice into the seedbed. (No water seeding, broadcast, etc.)
- Follows RiceTec recommendations to enhance seed germination and stand establishment opportunities.
- Have a RiceTec Representative view the field in question and confirm eligibility to replant that field.
- Replanting RiceTec fields without RiceTec advice will forfeit the opportunity to receive the replant seed.
- When replant is determined to be necessary, only RiceTec seed may be used for the replant.
- Replant seed will not be provided to customers with unpaid seed balances.

PROCESS TO RECEIVE 100% REPLANT

- When determined a replant is needed and customer intends to qualify for the RiceTec Loyalty Customer Rebate, the replant will be entered in the RiceTec ordering system at 100% no charge.
- Customer must follow guidelines and qualify for RiceTec's Loyalty Customer Rebate.
- If customer does not qualify for RiceTec's Loyalty Customer Rebate, customer will be invoiced the standard 50% list price replant with terms of Net 15.

ADDITIONAL INFORMATION:

- If, at the time of replant determination, it is determined to be a RiceTec seed quality issue, and it is unfeasible to replant rice in the field during 2027, RiceTec will provide deferred replant seed for the following season to plant 50% of the equivalent acres at our recommended seeding rate.
- To qualify for deferred replant, the current/remaining hybrid rice crop must be destroyed and no rice can be planted in the field until next season.

SEED RETURN POLICY 2027

2027 PURCHASED SEED CAN BE RETURNED UNDER THE FOLLOWING GUIDELINES:

RiceTec will allow customers to return a maximum of 10% of the customer's total 2027 RiceTec seed purchase.

ELIGIBILITY

- ✓ Unopened 2027 purchased mini-bulks (40 unit equivalent), half mini-bulks (20 unit equivalent) and paper units are eligible.
- ✓ Seed must have been purchased at the RiceTec published price.
- ✓ Seed must be returned to Service Representative from where seed was purchased by June 15, 2027.
- ✓ All unused seed must have been stored in appropriate conditions, protected from weather and rodents, in the original sealed mini-bulks, half mini-bulks, or paper units, and in salable condition.
- ✓ Opened mini-bulks, half mini-bulks, or paper units cannot be returned under any circumstances.
- ✓ There must be a signed 2027 RiceTec Seed Sales Agreement to be eligible for return privileges.
- ✓ Any seed overtreated with any additional seed treatments is not eligible for return.
- ✓ All RiceTec approved return seed greater than 10% of customer's total RiceTec seed purchases will be assessed a 25% restocking fee.

SEED RETURN PROCESS

- Seed eligible for return must be in unopened, undamaged, mini-bulks, half mini-bulks, or paper units.
- All seed must be returned to the Service Representative location from which the seed was purchased by the latter of June 15th, 2027, or within 15 days after sales orders which are entered after June 1, 2027. Any exceptions must be approved by RiceTec Customer Service in advance and in writing.
- All seed requested for returns from June 16, 2027 through June 30, 2027 may be assessed a 25% restocking fee on orders placed prior to June 1, 2027, subject to review by customer service. A 25% restocking fee may apply to seed orders entered after June 1, 2027subject to review by customer service, which is not returned within 15 days following the order date.
- After June 30th, 2027, "NO" returns will be accepted on orders placed prior to June 1, 2027.
- Service Representative must provide in writing the customer return information to the RiceTec representative, including the customer's full name, units, and lot numbers. The information can be provided via text, or email within two (2) days after the return is made or the seed return will be subject to revocation.
- RiceTec's Customer Services will provide confirmation to the RiceTec representative and Service Representative of the entered return.

FOLLOW UP

- RiceTec will submit an invoice for any applicable restocking fees. These fees will be deducted from any amounts due to the customer. If no amounts are due, payment of the invoice is required within 15 days.
- If all stipulations of the return program policy, as stated above, are not followed by the customer and/or the Service Representative location to which the return is made, RiceTec has the right to refuse the return and/or credit of the account.

REPLANT POLICY 2027

ELIGIBILITY

- Customer orders and receives seed from an authorized RiceTec Service Partner location in 2027.
- Customer must use current year tested and germ guaranteed seed to be eligible for replant.
- Customer must have a RiceTec Representative view the field in question and confirm eligibility.
- Customers who choose to replant RiceTec fields without first being viewed by RiceTec personnel will forfeit the opportunity to receive the replant seed at 50% list price.
- When replant is determined to be necessary, only RiceTec seed may be purchased for replant.
- RiceTec will offer RiceTec seed purchased at 50% full list price to replant the field in question in 2027.
- 50% replant seed will not be provided to customers with any unpaid seed balances.

ADDITIONAL INFORMATION

- If there is seed available for sale which is located at a service partner location, that seed can be used to fill a replant sales order.
    - RiceTec will credit the original seed order for the replant seed acres at the initial purchased price.
    - RiceTec will rebill the same seed on a replant order at 50% of list price.
- If, at the time of replant determination, it is determined to be a RiceTec seed quality issue and it is unfeasible to replant rice in the field during 2027, RiceTec will provide deferred replant seed for the following season to plant 50% of the equivalent acres at our recommended seeding rate, as long as the customer purchases the other 50% of the equivalent acres for planting the following season at the then published price.
- To qualify for deferred replant, the current/remaining RiceTec rice crop must be destroyed and no rice can be planted in the field until the following season.

FINANCIAL PROGRAMS 2026-2027

Talk to your sales representative about the 2027 finance programs available through John Deere Financial.

PROGRAM PERIOD	CUSTOMER OFFER	MINIMUM INITIAL PURCHASE	PAYMENT DUE DATE
December 1, 2026 - December 31, 2026	No payments and no interest until 8/1/2027 followed by Prime +1% APR[1]	$1,000	Due in full November 2027
PROGRAM PERIOD	**CUSTOMER OFFER**	**MINIMUM INITIAL PURCHASE**	**PAYMENT DUE DATE**
January 1, 2027 - July 31, 2027	No payments and no interest until 8/1/2027 followed by Prime +5% APR[1]	$1,000	Due in full November 2027

ADDITIONAL INFORMATION FOR SPECIAL PROMOTIONS TRANSACTIONS

- Customer must have an Ag Preferred Multi-Use Account™ with John Deere Financial and a Special Terms credit limit.
- All transactions are subject to John Deere Financial approval and distributor participation.
- Principal balance and all other accrued interest and finance charges associated with the Special Terms finance transaction are due in full on the customer's November 2027 statement due date as described above.
- If the customer fails to pay the balance on the due date reflected on the statement, the Annual Percentage Rate (APR) applicable to the account will apply to this purchase.
